

Telehealth Services for Substance Use Disorder Treatment and Management

SUMMARY

As the opioid crisis and the substance use disorder still shakes our communities, many organizations are turning to telehealth to get care to the most vulnerable of populations.

This engagement will enable you to design and launch an effective remote substance use disorder treatment program.

PROCESS

A We will work with your clinical, operational, administrative, and technical leadership to create a tailored program that addresses:

- 1) Strategic, Clinical and Business Case Development
- 2) Clinical, Operational, and Administrative Workflow Design
- 3) Technology Specification and Vendor Selection
- 4) Operationalization (e.g., performance management, legal/regulatory compliance, billing, training, operational & technical support, marketing, etc.)
- 5) Proof-of-Concept (including design improvements, assumption validation, etc.)
- 6) Program Implementation (including training, deployment, organizational change management)

CUSTOMIZATION OPTIONS

This engagement can be structured as Advisory, Collaborative or Managed:

A) Advisory: “We’ll guide you”; B) Collaborative: “We’ll do it with you”, or Managed: “We’ll do it for you”
